SUMMARY

IT consultant and small-business MSP owner with 20+ years of hands-on network engineering, infrastructure, and technology leadership experience. Specializes in Ubiquiti UniFi network design, Microsoft 365 deployment, and modernizing legacy infrastructure for small organizations.

SKILLS

- Network design & deployment (Ubiquiti UniFi, VLAN segmentation, SD-WAN)
- Microsoft 365 administration (E5, Exchange, Teams, security/compliance)
- VoIP deployment
- Data center rack & stack
- BGP / self-hosted networking infrastructure
- Linux systems administration, Proxmox virtualization
- Git / GitLab administration

EXPERIENCE

Owner

2003 – Present

Jeff Parrish PC Services · Zion, IL

- Run a part-time small MSP providing IT solutions to local businesses
- Specialize in designing and deploying Ubiquiti UniFi networks for small-business clients

Sr. Data Center Engineer

Dec 2025 – Mar 2026

The Judge Group · Mount Pleasant, WI

- Performed rack & stack for a Microsoft AI datacenter build-out

IT Lead & Director of Technology, Safety & Security

2010 – 2025

Bayside Terrace, LLC · Waukegan, IL

- Began modernizing a flat legacy network on the side of a primary role, including rebuilding a crashed server when the outside MSP failed to respond — work that led to promotion into a formal Director of Technology, Safety & Security position
- Overhauled network infrastructure to Cat5e and UniFi with segmented VLANs
- Implemented VoIP and Microsoft 365 E5 across the organization
- Migrated internet service from Comcast to SD-WAN to fiber
- Wrote and rolled out updated safety policies

EARLY BACKGROUND

Retail/consumer electronics sales, RadioShack (1995–2000); independent software development in Visual Basic/Pascal, Greenhills Software (1990).
